

Jorge Domingues Nunes

Senior Directus / Headless Platform Engineer — Directus 11 & 12 · Next.js · Flutter · React Native · PostgreSQL

Pombal, Portugal (remote, CET) | +351 914 764 120 | stamina.nunes@gmail.com | linkedin.com/in/stamina | github.com/stamina | iamjorgenunes.com

SUMMARY

Senior full-stack engineer in Portugal (CET), 12+ years, with Directus 11 and 12 as the backbone of production systems: clean data models that hold up under integrations, transactional flows with explicit locking and idempotency, and native guest-facing apps shipped to the App Store and Play Store. Security background from three years at the European Central Bank, European Commission platforms and SOC 2 / ISO 27001 delivery.

DIRECTUS IN PRODUCTION

- ▶ api.romanceinroom.com — Directus 11 + PostgreSQL e-commerce, Flutter clients (iOS / Android / web)
- ▶ dev.mdbaudio.com — Directus 12 + Next.js, multilingual, embedded booking; Directus Innovation Grant
- ▶ **Keyprog** — multilingual B2B/B2C automotive e-commerce on Directus + React + Stripe
- ▶ @stamina/directus-mcp-server — full Directus API coverage for AI agents, 97%+ test coverage

SECURITY & CERTIFIED DELIVERY

- ▶ ECB: CSP hardening, rights administration, auditable logging of every CMS operation
- ▶ Co2Offset: SOC 2 and ISO 27001 compliance; Bureau Veritas pipeline audit that unlocked €2.5M of business
- ▶ Audit trail aligned with ISO/IEC 42001 (Exponent)

SELECTED STACK

DIRECTUS

Data modelling, roles / policies / ACLs, Flows, hooks, endpoint and interface extensions, webhooks, SDK, REST and GraphQL, multi-tenant setups, audit trails

FRONTEND & MOBILE

Next.js, React, TypeScript; Flutter / Dart and React Native + Expo (store deployment)

BACKEND & DATA

Node.js / TypeScript, Python (FastAPI), Go; PostgreSQL / PostGIS, Redis,

EXPERIENCE

E-commerce Operations & Platform Lead — Romance in Room

2025 – Present

Own D2C store, PT · Directus 11 + PostgreSQL + Flutter (web, iOS, Android) · Docker on a VPS

- ▶ **Platform:** built and run the Directus 11 backend at api.romanceinroom.com for 9,600+ SKUs and 29,000+ images in five languages (PT/EN/ES/FR/IT), with per-product SEO records and Product + Breadcrumb JSON-LD.
- ▶ **Extensions:** custom endpoint for typo- and accent-tolerant search (~10k SKUs, <30 ms); hook extensions for voucher validation with anti-abuse rules and order totals; roles, policies and ACLs for guest vs. authenticated checkout.
- ▶ **Payments & reconciliation:** MB WAY / Multibanco (ifthenpay) webhook with signed callbacks, amount verification, idempotency and anti-replay checks; 10-minute reconciliation job against the provider's status API; Odoo ERP invoicing with idempotency guards against duplicate invoices.
- ▶ **Supplier integration:** dropship order forwarding through the supplier's API with atomic reservation so concurrent events can't double-order; stock and catalogue sync, 30-minute tracking polling into shipment records.
- ▶ **Order state machine:** pending → paid → preparing → shipped → delivered / cancelled / refunded, with e-mail, push and in-app notifications at every transition; promotions run from the CMS with no code release.
- ▶ **Compliance & coordination:** 18+ age gate, cookie consent, privacy/terms, IARC rating and Play / App Store policy; sole coordinator across six external parties with runbooks, post-mortems and release plans.

Also: Keyprog — multilingual B2B/B2C automotive e-commerce on Directus + React + PostgreSQL + Stripe: customer groups, pricing tiers, localised catalogue.

Senior Product Engineer — MDB Audio

Jan 2024 – Present

Recording-studio platform — Directus 12 + Next.js, booking and content management · Aveiro / Remote

- ▶ **Booking platform:** multilingual Directus 12 + Next.js site with studios catalogue, artist showcase and lead capture; embedded self-hosted scheduling with graceful fallback and e-mail confirmations. Received a Directus Innovation Grant.
- ▶ **Directus extensions:** per-user mailboxes built as extensions; agent-driven research pipeline writing verified leads into Directus; published the Directus MCP server (29+ tools) so AI agents can query and act on the backend.
- ▶ **Backend & delivery:** Node.js / TypeScript services, PostgreSQL, Redis; Auth0 (OAuth2 / OIDC, RBAC); Docker Compose parity; unit, integration and e2e suites; Hetzner Linux server with git-driven deploys and systemd.

Founder & Fullstack Product Engineer — Exponent

Nov 2025 – Present

- ▶ AI/DevOps automation platform in production: FastAPI, React, PostgreSQL, Redis and n8n as Docker microservices; Terraform-managed infrastructure, health probes and graceful shutdown; audit trail aligned with ISO/IEC 42001.

Senior Engineer (Backend & Platform) — Co2Offset.ai

Apr 2023 – Dec 2024

- ▶ 200+ containerised Node.js microservice endpoints on Kubernetes; PostgreSQL / PostGIS, MongoDB, Redis; AWS with Terraform and Ansible; GitHub Actions CI/CD; Stripe payments; React Native / Expo app on both stores.
- ▶ Worked directly with the European Space Agency on requirements; led the Bureau Veritas pipeline audit that unlocked €2.5M of business; SOC 2 and ISO 27001 compliance.

Elasticsearch; Auth0 (OAuth2 / OIDC, JWT, RBAC)

PAYMENTS & INTEGRATIONS

Stripe, MB WAY / Multibanco (ifthenpay), Odoo ERP, supplier order APIs, OneSignal, n8n

INFRA & DELIVERY

Docker / Compose, Kubernetes, Terraform, Ansible; Hetzner VPS and AWS; Linux hardening (systemd, Nginx / Apache, TLS); GitHub Actions, GitLab; Vitest, Jest

WAYS OF WORKING

Fixed-scope architecture sprints, end-to-end ownership, direct client contact, fluent English

Technical Consultant, Web Platform — European Central Bank

Mar 2020 – Mar 2023

- Core CMS, website, intranet and extranet: job queue, user and group rights administration, staging → preview → live sync tool, and log management for auditable tracking of every operation.
- Content Security Policy against XSS and unauthorised access, SHA-256 TLS across Apache virtual hosts, security review of existing modules; ElasticSearch indexing content in 24 languages across millions of pages.

Senior Developer — European Commission

Apr 2018 – Jan 2020

- Main-site redesign: relational data model for tens of thousands of users, MySQL and Apache tuning, Drupal batch API tools; Jenkins / GitHub Actions CI/CD with Jest; several platform migrations; WCAG / ARIA accessibility.

EDUCATION

Computer Graphics & Multimedia Engineering — Instituto Politécnico de Viana do Castelo

2003 – 2006

3-year Bacharelato (pre-Bologna undergraduate degree) · C, C++, Java, data structures, databases, real-time 3D graphics, HCI

Computer Technician, Informatics Technological Course — Escola Secundária de Pombal

2001 – 2003
